

PROFILE

Music marketing professional with 5+ years driving paid acquisition, audience growth and release campaigns for independent artists, labels and management companies. Founder of GNRE — a music marketing and web design studio delivering Meta/TikTok paid media, full-funnel strategy, audience segmentation, CRM and AI-automated workflows.

Proven track record scaling artist audiences through data-led paid campaigns, landing-page optimisation and creative strategy across UK, US and EU markets. Combining hands-on campaign execution with creative direction, web development and automation to deliver consistent, scalable growth for emerging and established artists across multiple genres and territories.

EXPERIENCE

- Founder & Creative Director — GNRE Music Marketing & Web Studio2022 – Present
- Founded and scaled a music marketing studio delivering paid media, web design and branding for independent artists, labels and management companies across UK, US and EU markets — managing end-to-end campaign strategy, execution and reporting for a growing roster of clients across multiple genres and territories.
 - Plan and execute full-funnel paid campaigns on Meta, TikTok and YouTube — audience targeting, retargeting, lookalike modelling and A/B creative testing optimised against streaming growth, conversion and revenue KPIs with monthly spend allocations spanning multiple client accounts simultaneously.
 - Design and ship artist websites and high-converting landing pages in Framer and Webflow — integrating DSP pre-save links, mailing-list capture via Mailchimp and custom analytics tracking for campaign attribution and funnel performance monitoring across all active channels.
 - Lead branding, visual identity and motion-graphics production for album and single releases — delivering cohesive campaign assets that strengthen artist identity and support cross-platform promotional rollouts across social, streaming and PR channels.
 - Develop and maintain AI-assisted workflows for creative production, CRM automation and campaign reporting — reducing creative turnaround times while improving output consistency and enabling data-driven decision making across all active campaigns.
 - Provide strategic consulting to artists and labels on release strategy, monetisation, DSP pitching, audience development and career roadmap planning — tailoring recommendations to each artist's specific stage, genre and commercial objectives.

- A&R Consultant — Music Gateway2022
- Evaluated and curated artist submissions from an international talent pool — identifying emerging acts with commercial potential and delivering structured assessment reports with actionable A&R recommendations to the senior team for shortlisting and development planning.
 - Developed bespoke marketing and release strategies for shortlisted artists — covering brand positioning, social media strategy, audience growth tactics and platform-specific content plans for Spotify, Apple Music and TikTok aligned with each artist's unique positioning and target audience.
 - Coordinated with producers, songwriters and industry contacts to scope collaboration opportunities, sync licensing briefs and artist development roadmaps — facilitating introductions and project planning across the network to accelerate artist growth and market readiness.
 - Conducted in-depth market research across streaming platforms and social channels to identify genre trends, emerging scenes and audience demand signals — directly informing A&R decisions, talent development direction and roster strategy.
